

Your Partner for IT Solutions

Our solutions are your benefit!

hs²n is characterized by creative thinking and innovative solutions. A wide range of know-how, a longtime experience in projects and a customer-oriented approach makes **hs²n** an ideal partner for IT services.

Our Core Competencies

Software Development

We develop all-in-one solutions according to your individual requirements. We integrate the new specific software in the existing IT systems and provide interfaces to ERP and process control systems. As your reliable partner, we support you in all project phases - from design to go-live and maintenance.

hs²n Software Development offers:

- › sophisticated and tailor-made solutions
- › optimized integrated processes
- › high profitability
- › professional service

Outsourcing / Outtasking

If you want to outsource your IT infrastructure fully or only in part, trust in our experience. A helpdesk and on-site support by **hs²n**'s qualified staff guarantees optimal service. On request our support team gives trainings for your employees. Furthermore, we provide remote support.

Outsourcing to hs²n allows you:

- › concentration on your core business
- › confidence on a secure system
- › ITIL compliance
- › reliable troubleshooting

Consulting

As external consultants, we first analyze processes and workflows. Based on that, we deliver concepts and strategies and show how you can reach your goals. We also help you to find and fix security vulnerabilities in your systems before they become a serious threat for your business. Furthermore, we offer consulting preceding the start of projects such as feasibility studies.

hs²n Consulting advises you in:

- › IT infrastructure
- › process optimization
- › technology decisions
- › IT security

XEOX

Using this integrated system management tool you can administer hardware, software, user accounts and networks comfortable from a central repository. In addition XEOX can be adapted and customized according to your needs. Its user-friendly handling makes the administration of the IT infrastructure much easier.

XEOX by hs²n facilitates:

- › Asset Management
- › Unattended Windows Setup
- › Software Rollouts
- › User Management

Company History

2001

The three IT-specialists Markus Huber, Michael Satlow and Gerald Novak start working together. To indicate the cooperation they choose the name "HSN" – composed of the initials of their surnames. HSN works successfully on various projects and develops the system management tool XEOX.

2005

HSN decide to take a step further and found a private limited company, now named „**hs²n** Informationtechnologie GmbH“. **hs²n** acquires new clients and extends the range of services. The Carinthian based company establishes a new branch in the capital of Austria, Vienna.

2006

The increased number of clients requires to recruit more highly skilled staff. **hs²n** develops „calling home“ - a product for remote support beyond the firewall of the clients system, without any security risks.

2007

A new branch in St. Veit a.d. Glan joins the headquarter in Villach to establish the Carinthian business location. **hs²n** designs a filesharing tool which combines the advantages of FTP (data volume) and email (one-to-one-communication).

2008

hs²n provides advanced network engineering (e.g. with Cisco). Due to the security and efficiency of the tool the demand for XEOX is rising continuously.

Company Profile

hs²n offers IT services in the areas of Individual Software Development, Consulting and Outsourcing. Our expertise lies in integrated solutions that are customized to needs of our clients as well as comprehensive support of IT environments.

Innovative software products like XEOX complete our portfolio.

If we have to face tasks outside our core competencies we work with trusted partners. Therefore we provide as well Data-Warehouse and Data-Mining, ERP systemes, Thin Client / Terminal Server.

Our clients range from small and medium sized companies to large enterprises from many different sectors, who work with us in long term business partnerships.
